DAKSH LALWANI

Full-Stack Web Developer

Bhopal, India | +91-7898068165 | dakshlalwani89@gmail.com | linkedin.com/in/dakshlalwani-374212308 | github.com/Daks9h

SUMMARY

B.Tech Computer Science (AIML) student at LNCT Bhopal who builds full-stack web applications with the MERN stack and Python/FastAPI. Built a RAG-based study assistant with a Chrome extension and a role-based rental marketplace with JWT authentication. Web developer experience across startups and an open-source program; Java and DSA foundation (NPTEL Java certified).

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL, HTML, CSS
Frameworks / Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, EJS, EmailJS
Databases / Backend: MongoDB, Supabase (PostgreSQL, pgvector), Firebase, REST APIs, JWT authentication
AI / ML Tooling: Groq API (LLaMA 3.1), Sentence-Transformers, Faster-Whisper, RAG pipelines
Developer Tools: Git, GitHub, Postman, Figma, FFmpeg, Vercel, Render, npm, VS Code
Core Concepts: Data Structures and Algorithms (Java), Role-Based Access Control, Media Upload Pipelines

PROJECTS

AI StudyMate – Multimodal AI Study Assistant & Chrome Extension

Python, FastAPI, Groq API (LLaMA 3.1), Faster-Whisper, Sentence-Transformers, Supabase (pgvector), JavaScript (Manifest V3), FFmpeg

- Built an end-to-end RAG study platform and Manifest V3 Chrome extension for interactive Q&A over YouTube lectures and uploaded video/audio files.
- Engineered a transcription and ingestion pipeline using FFmpeg and faster-whisper for local media, and the YouTube Transcript API for streamed lectures.
- Implemented semantic chunking and vector search with Sentence-Transformers embeddings stored in Supabase pgvector for context-aware retrieval.
- Integrated Groq-hosted LLaMA 3.1 to generate answers with timestamp-linked citations that jump video playback to the referenced segment; added generated flashcards, summaries, timelines and auto-graded quizzes.

Homify – House Rental & Property Marketplace

MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary, Multer, REST APIs

- Built a full-stack MERN marketplace connecting property owners and tenants directly, with multi-parameter search and filters (location, BHK, rent/sale, budget) and a saved-property wishlist.
- Implemented 3-role access control (Renter, Owner, Admin) using JWT stateless authentication, bcrypt password hashing and custom route-protection middleware.
- Built an image upload pipeline with Multer memory storage and Cloudinary streaming APIs, avoiding local disk writes.
- Developed a booking workflow in which owners approve or reject tenancy requests, and an admin panel to audit user activity and grant verified-owner permissions.

SafalDarshan – Temple Tourism & Darshan Guidance Platform

React.js, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS

- Developed a full-stack MERN application providing pilgrimage guidance, temple schedules, ritual booking details and transit information.
- Designed MongoDB schemas with indexed queries for temple histories, darshan timings and pooja offerings; built Node.js/Express REST APIs with input validation and error-handling middleware.
- Built a component-based React frontend with dynamic search, category filtering and responsive layouts.

EXPERIENCE

Full Stack Engineer (MERN) – ISA-India May 2026 – Present

Web Developer – Wedeption Apr 2026 – Jun 2026

React.js, Firebase, Supabase

- Developed full-stack features for a vendor-discovery platform, supporting vendor search and user interaction.
- Integrated frontend components with backend services (Firebase, Supabase) to manage application data flow.
- Collaborated with the KLIC LNCT Bhopal team to design, test and deploy product features.

Open Source Contributor – Code Social Nov 2025 – Jan 2026

Frontend Developer – Edunet Foundation Sep 2025 – Nov 2025

HTML5, CSS3, JavaScript, React.js

- Built responsive React.js UI components for consistent use across devices.
- Integrated APIs and managed application state to implement interactive features.
- Fixed bugs and refined interface usability with teammates.

EDUCATION

B.Tech, Computer Science (AIML) – Lakshmi Narain College of Technology, Bhopal Sep 2024 – 2028

CGPA: 8.31 / 10

CERTIFICATIONS & ACTIVITIES

Certifications: NPTEL Java; Postman API Fundamentals Student Expert; JavaScript Foundations (Mozilla); Career Essentials in Generative AI (Microsoft & LinkedIn); GenAI Study Jams
Activities: Administrative Team Member, E-Cell LNCTS; Casting Director, LNCT Ensemble (Art & Drama Club)
